

Qiip Safe | Detect

Real-Time Detection. Human Verification. Rapid Response.

Detect equips districts with on-premise AI and human oversight to identify potential threats early – without replacing existing camera systems.

It transforms campus video networks into an integrated safety system that sees, verifies, and responds in seconds

Why Detect Matters

- ✓ Real-time detection with human confirmation
- ✓ Faster, coordinated responses to verified threats
- ✓ Full audit trail for compliance and grants

Core Capabilities

- **Edge Appliance** – Connects to existing VMS (RTSP/ONVIF); performs local analytics for firearm, intrusion, gunshot, familiar face, and license plate recognition.
- **Human Verification** – Events routed to trained reviewers in Qiip Safe Center for verify/dismiss actions with notes.
- **Closed-Loop Response** – Triggers playbooks, notifications, and optional lockdown commands.
- **Follow-Mode Tracking** – Links multiple cameras for continuous subject visibility.
- **Reporting & Prove** – Metrics on detection accuracy, time-to-verify, and evidence exports.

Designed for Your Team

- Safety Leads / SROs – Respond to verified alerts and initiate lockdowns.
- District Safety Directors – Set policy, escalation paths, and reporting.
- IT / VMS Admins – Connect cameras, manage updates, and network health.
- Human Review Teams – Verify flagged events in real time for accuracy and privacy.

Proof & KPIs

- Mean time-to-verify ≤ 60 seconds
- False-positive rate reduction through human review
- End-to-end audit trail integrated with Qiip Safe Prove

Optional Add-Ons

- Acoustic Sensor Kits
- Exterior LPR Cameras
- Connected Door Locks
- Environment Sensors
